A flood itself is just part of the problem. Let much time go by without addressing it and you'll likely face much deeper, more costly issues, such as mold and bacterial growth and structural damage. Call Certified Restoration no matter the day or time—you can breathe a little easier knowing we'll do everything we can to be at your door in 60 minutes or less.

Faster, Better Service to Save You Time and Money

Our goal is to catch and remediate the problem as quickly as possible to prevent a more expensive and troublesome situation for you. We use our knowledge, skills and the latest techniques and technologies to get the job done faster and better.

Fewer Hassles, Less Worry from Start to Finish

We start with a thorough, expedient assessment and give you a plan of action designed to keep costs to a minimum and get your life back to normal as fast as possible. If structural repairs or cleaning are needed, our team of professionals can take care of it for you. We work directly with your insurance company and bill them to save you the hassle and paperwork.

Integrity and Professionalism You Can Trust

We always keep your best interests in mind. We'll only do as much as you need, because we don't believe in creating more work than necessary in order to elevate the cost. When you invite us into your home or business, you'll find us professional in both appearance and conduct.
